

**SUSTAINABLE
GROWTH**
COALITION

WHO WE ARE

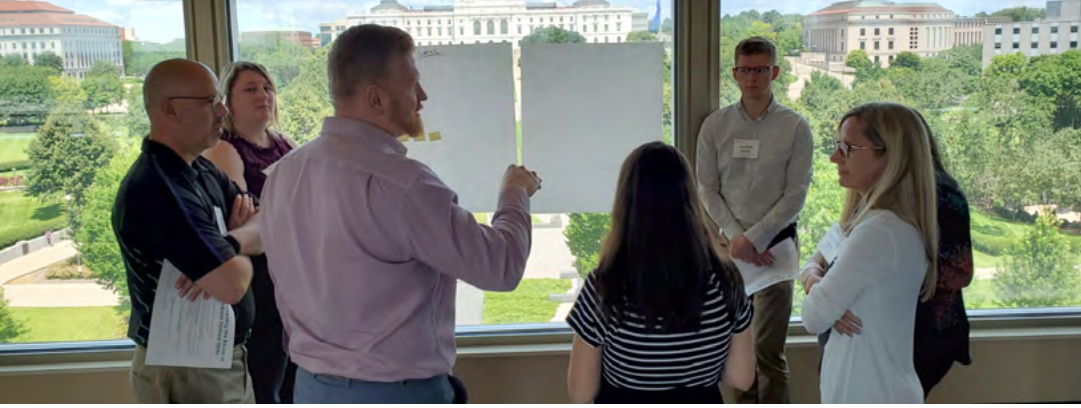

The Sustainable Growth Coalition is a business leadership group of over 20 organizations advancing a circular economy through collaboration. Individually, each organization is committed to sustainability, and recognize that together they can have a larger, societal-level systemic impact on their operations, industries, environment and community.

CURRENT MEMBERS

What's Our VISION FOR SYSTEMS CHANGE?

The Sustainable Growth Coalition is moving our region toward a thriving circular economy - where all energy is renewable, waste is eliminated, and natural resources are protected and preserved. As the next frontier of corporate sustainability, circular economy principles uncover business growth opportunities, drive innovation, and promote thriving communities and regions.

OUR WORK

Members support the Sustainable Growth Coalition by co-creating strategies and projects, leading as individual organizations to further circularity goals, and contributing member dues and sponsorships. In the past, we have:

- Launched an executive network exploring collaborative opportunities at the intersection of circularity and equity.
- Facilitated member testimony at the Minnesota legislature and hosted a breakfast with policymakers regarding the business case for creating and supporting climate and energy policies aligned with our vision.
- Promoted the business case for circularity and systems change through the launch of our **Circularity Toolkit**, **Customer/Utility Collaboration Case Study** and the public trainings on these topics.
- Adopted three-year goals in 2020 to guide long-term strategy and actions.
- Developed a taskforce to work on cross-cutting systems opportunities, including at the intersection of equity and circularity.
- Partnered with energy system leaders to showcase projects that support systemic change in the energy transmission system and fleet electrification.

Will you join us?

IN THE COALITION, TOGETHER WE:

Build brand value and sustainability thought leadership on a regional and global scale

Leverage relationships in civic and business leadership groups, and gain access to decisionmakers to raise awareness of gaps and barriers preventing circularity and prosperity

Connect, share learnings and collaborate across sectors and industries

Showcase accomplishments in the press and with key decisionmakers by modeling your leadership

Elevate the business value for systems change, equity, and economic growth impacting people, communities and businesses
